PHYSIOLOGICAL GENOMICS

Volume 13

Published by The American Physiological Society

an
OPEN ACCESS
journal

Authors can choose to pay a \$1500 fee to have their article published online with Open Access from the first date of publication or choose to pay no author fees and leave their article under Subscription Access. Open Access means that those online articles are completely free to any person or any library. All online content associated with the article (text, figures, supplemental material) is freely accessible. Subscription Access means that an individual needs a subscription

or to pay a small, pay-per-view fee to access the online article for the first 12 months after publication. Twelve months after publication, all online articles and supplemental content related to those articles are freely accessible to the world.

About Physiological Genomics:

Physiological Genomics (physiolgenomics.org) is an online-first publication of The American Physiological Society (APS). *Physiological Genomics* publishes high-quality research in computational biology, proteomics, expression profiling, microarrays, and the genetics of complex disease. We are now in our fifth year of publication, with a **2003 ISI Impact Factor of 4.368**. Our contributors are involved in cutting-edge research that takes advantage of the rapidly expanding wealth of genomic information to elucidate the link between genetics and physiology. Scientists are using this integrative approach in all areas of physiology and medicine, and APS remains in the forefront by publishing quality research in these fields. *Physiological Genomics* provides a speedy electronic peer review process, with the average time from submission to first editorial decision about a month. We offer immediate electronic publication of your paper upon acceptance.

For more information on Open Access, see:

IEEE is *PATENTS.*

The most valuable assets in Lee's company are patents based on IEEE-published research.

IEEE science is the foundation for today's inventions and tomorrow's technology innovations. Patents cite IEEE research three times more than any other publisher – and referencing to IEEE papers has increased 267% in the last decade.

Patents mean more successful products and higher sales. Studies show that patents and investment in R&D are key factors in a company's profitability. Access to IEEE publications can help your company develop new patents, compete in the global marketplace and become a leader in your field.

To Lee, IEEE is patents. Discover what IEEE can be for you.

Introducing Online Proceedings

4,800 papers • 50,000 pages • Full-Text Database

Librarians! Now you can offer your engineers online access to ASCE conference proceedings. The new ASCE Online Proceedings provides access to ASCE conference papers from 2003 to the present. The strong "practical applications" focus of these papers provides practitioners and researchers with in-depth coverage of emerging technologies and leading-edge technical findings presented at key civil engineering conferences around the world – information often unavailable anywhere else. To sign up for the FREE Trial Access please contact **American Society of Civil Engineers** at 1-800-548-2723, 1-703-295-6300 or visit online at www.ascelibrary.org.

Access and Usage: A Research Library subscription is not required to use the search and browse features or to view tables of contents and abstracts. Downloading full-text digital paper is available only to subscribers. Institutional subscribers gain access to the REsearch Library via their organization's IP addresses and may use the archive in a manner consistent with their institutional license agreement. All full-text papers are provided in PDF format. Archival Policy: An optional archival CD ROM will be available.

New Subscription Options Deliver More Online Content in 2005

Complete AIP journal backfiles available online in 2005

In 2005, all AIP journals will be available online beginning with Volume 1, Number 1. This impressive amount of newly digitized material will provide users with tens of thousands of additional articles online – some going back more than 70 years. Regular subscriptions will include a five-year backfile (2000-2004), but for a small additional annual fee you can provide your patrons with the complete online archive of any AIP journal.

New online subscription for AIP Conference Proceedings

AIP has created a new subscription for 2005 that will provide online-only access to our Conference Proceedings series. Volumes will be available from January 2000 forward – more than 200 volumes – and the cost for all institutions is \$4,950. This offers significant savings off the price of a print standing order. Online access is still available to standing order customers at no charge.

New combination package includes all AIP content

AIP has expanded its discounted package subscription offerings with the introduction of AIP Archival Plus. This package includes all the content of the AIP Archival combination, complete backfiles as available, and the following titles: AIP Conference Proceedings (online only), *Geochemical Transactions* (online only), *Journal of Physical and Chemical Reference Data*, and *Low Temperature Physics*.

<http://librarians.aip.org>

License a prestigious collection of science and engineering journals

AIP can tailor a consortia package to your needs, allowing you to provide electronic access to an unlimited number of users – regardless of their physical location. Many of the more than 100 journals in our collection are among the most highly cited in their field. Societies participating in AIP's consortia program include APS, ASCE, ASME, OSA ASA, AVS, AAPT, AAPM, SoR, ICDD, SEG, ECS, and MAIK. For further information, e-mail mdrargo@aip.org.

Register for the Scitation Usage Statistics Service

With the Scitation Usage Statistics Service, librarians can now view usage reports for the AIP, APS, AAPT, ASCE, ASME, and SPIE online journals to which they subscribe. This web-based password-protected service allows you to generate customized reports at your convenience. The Scitation Usage Statistics Service will soon be COUNTERcompliant. For more information, visit <http://librarians.aip.org> or email onlinehelp@aip.org.
